*Allow us to jazz things up with attention grabbing science experiments!
We effectively engage students by utilizing demonstrations and hands-on experiments to educate them about the world we live in! Let's not forget the importance of collecting data, scientific theory, and conducting research.*

✦ Thursday June 15- 4:30-5:45

✦ Thursday May 25th- 4:30-5:45

✦ **Checks may be made payable to the town of Westerly: \$10/child**

✦ *Maximum of 30 students; sign up ASAP either online (westerly.rec.com) or by filling out the paper registration form and submitting it to the Tower Street Community Center main office.*

✦ *We provide two experienced teachers, with scientific expertise to educate from pre-school through middle school students (ages 5-14)*

Brief Overview of topics covered during the two workshops:

1) **The Science Behind Magic**

Often magicians don't share their secrets as to how their phenomenon was conducted. During this workshop we will be experimenting with magic tricks. The workshop will consist of demonstrations and numerous hands-on experiments conducted by only the best magicians, you!

2) **Magnets in Motion**

The magnetic pull of our planet is a topic students enjoy probing further. From iron filaments, to various types of magnets, and understanding magnetic fields, students will be the leaders in this workshop. Additionally they will understand conductors versus insulators, as well as learn about animals who use magnetic fields to navigate in their environment!
